

## COMPENG 2SH4 Project – Statement of Contribution

Your Group Name Snake\_AandY

Your Name Yuvraj Singh

Your Team Member's Name Ayaan Hussain

**You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:**

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

**During the project I worked on Iteration 0 with my partner after which we worked in parallel for Iteration 1 and 2. I completed parts B for both these iterations. We then worked on Iteration 3 together.**

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

**My partner worked on Iteration 0 along with me and completed their respective parts for iteration 1 and 2 (Parts A). My partner also worked on Iteration 3 with me as well.**

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

**The largest issue encountered was issues with syncing work and Git. This cause significant frustration when trying to complete the parallel parts independently and sync changes while attempting to troubleshoot issues.**
